Directions for Use

1. Lightly sand area to be repaired.
2. Apply all-purpose joint compound 1/8" thick directly to back of patch. Place patch over center of repair and wipe down flat to wall with a taping knife. Immediately skim-coat patch and let dry dry. Compound that remains on back side of ULTRA-PATCH makes patch very rigid.
3. Apply second coat, let dry and sand. ULTRA-PATCH will not fuzz up during sanding

REPAIRS OVER PAINTED SURFACES. Strait-Flex recommends the use of Strait-Flex Super-Bond or latex paint, mixed with all-purpose joint compound, for enhanced bonding strength.
